DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Regarding claims 3 and 4, the phrase "especially" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention.

4. Regarding claim 5, the phrase "if necessary" renders the claim indefinite because it is unclear whether the limitation(s) following the phrase are part of the claimed invention.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Dopper et al (US 2001/0041873).

Dopper teaches a device (10) and method for loading a patient connector (14) with a closure plug (16) in a peritoneal dialysis system (Abstract), said device comprising a

Art Unit: 3767

housing (10), containing a closure plug (16) and means (push button 38) for transferring the plug out of the device and into the patient connector (14). See Fig 1 and 2.

As to claim 2, the housing 10 is shown connected to tubing 14, Fig 1. As to claims 3, 4, and 9 the phrase "can be connected" is a functional limitation, and two tubes (housing 10 and tubing 14) can be connected by either positive connection or friction-type connection. As to claims 5, 10, and 11 see push-button 38. As to claims 6 and 12, see P0025-0026, showing that the plug is retained in the cage 18 by a sealing force, which the examiner takes to be a frictional force. As to claim 7, see Fig 1.
